

Poster session

- 1-P1 Anna Willer ,
Qeqertarsuaq (GDH) Observatory: A Century of Geomagnetic Observations
- 1-P2 Metodi Metodiev
Panagyurishte Geomagnetic Observatory (PAG): Ninety Years of Continuous Geomagnetic Observations
- 1-P3 Benoit Heumez
A Multi Step Revival of Phu Thuy Magnetic Observatory, Vietnam
- 1-P4 Benoit Heumez
Advances in the IPGP Magnetic Station Network
- 1-P5 Junpei Oogi
Long-Term Geomagnetic Monitoring at Syowa Station, Antarctica: Toward Publication of High-Quality One-Second Data and Participation in INTERMAGNET network
- 1-P6 HaSeong Lee
Operational Status of the Cheongyang Geomagnetic Observatory and Long-term Geomagnetic Field Variation Analysis over the Korean Peninsula
- 1-P7 Tomáš Bayer
Geomagnetic mapping of the Czech Republic and its actual update
- 1-P8 Hardlife Zuka
Reconnaissance and Site Validation for Zimbabwe's First National Geomagnetic Observatory
- 1-P9 Ana Caccavari-Garza
Development of an Automatic Geomagnetic Observatory on Socorro Island, Revillagigedo Archipelago, Mexico
- 1-P10 Jan Wittke
MAG-SWE-DAN - Magnetometer Stations Network covering Scandinavia and Greenland
- 1-P11 Maki Hata
Magnetic Field Observations and Data Processing for a Long-Period Magnetotelluric Survey in the North Island, New Zealand
- 1-P12 Sangcheol Han
Ground-based Geomagnetic Observations on Volcanic Jeju Island: A New Installation Approach to Mitigate Underground Magnetic Field Effects

- 2-P1 Maria Rosa Alva Carmona
Key milestones at the Fúquene Geomagnetic Observatory, Colombia (2024–2026)
- 2-P2 Simon Salas Hernandez
From Historical Records to Near Real-Time Geomagnetic Monitoring: Local K-Index Implementation at Fúquene Observatory, Colombia
- 2-P3 Sohyeon Park
Quality Improvement of 2024–2025 Definitive Geomagnetic Data at the Cheongyang (CYG) Observatory Following INTERMAGNET Quality Assessment
- 2-P4 Cristiano Martins
Triaxial Fluxgate Magnetometer Scalar Parameter Estimation for Magnetic Observatories Purpose
- 3-P1 Josie Parrianen
A new data acquisition system for remote and temporary magnetic measurements
- 3-P2 Jan Oechsle
A DIY Approach to Reverse Engineering the Pandect LDC/a/20 Fluxgate Sensor
- 3-P3 Hideyuki Hirahara
Performance and Operational Evaluation of a New Single-Axis Fluxgate Magnetometer for DI-Meter Applications.
- 3-P4 Daniel Alexander Hipp
Calibration of Vector Magnetometers over a Wide Dynamic Range at the Conrad Observatory
- 3-P5 Vladimir Sapunov
DIMOVER: Development of compact highly uniform bias magnetic systems for vector-scalar Overhauser magnetometers
- 3-P6 Alexandre Gonsette
A new automatic instrument at LIV
- 3-P7 Masahito Nosé
Application of magneto-impedance (MI) sensor to geomagnetic field measurements for magnetoseismology
- 3-P8 Jun Kawai
High-Sensitivity LTS-SQUID Magnetometer Systems for Continuous Geomagnetic Monitoring: Design, Performance, and Geophysical Applications

- 4-P1 Shingo Nagamachi
Determination of K-index using a machine-learning-based method
- 4-P2 Benjamin Urrea
A Regional K-index for Chile: Space Weather Monitoring with Integrated Professional and Low-Cost Magnetometers
- 4-P3 Santiago Pinilla Capador
Near-Real-Time Computation of Local Geomagnetic Disturbance Index (Dlat) at Fúquene Observatory
- 4-P4 Ryoma Yoshida
Publication of the Geomagnetic Charts of Japan for the Epoch 2025.0
- 4-P5 Lev Muravyev
Observation of the Geomagnetic Secular Variation in the Urals near the Arti Observatory
- 4-P6 Mariko Teramoto
Detection of the South Atlantic Anomaly Using Magnetic Field Data Observed by the Arase Satellite
- 4-P7 Yoshiya Usui
Broadband magnetotelluric and Network-MT measurements in a seismogenic zone around western Ibaraki Prefecture
- 4-P8 Gita Amelia Marianto Limbong
Broadband Magnetotelluric Survey for Unveiling the Magma Reservoir Beneath Mount Asama, Central Japan
- 4-P9 SHIN ARITA
The Role of Geomagnetic Observation in the Volcano Monitoring of the Japan Meteorological Agency
- 4-P10 Ikuko Fujii
Long-Term Variations of Total Magnetic Intensity at Izu-Oshima Volcano
- 4-P11 TAKAO KOYAMA
Geomagnetic changes associated with volcanic activity at Shinmoedake Volcano, Japan, detected through repeated aeromagnetic surveys
- 4-P12 Ryokei Yoshimura
Long-Term Continuous Electromagnetic Monitoring Before, During, and After a Large Earthquake: The 2024 Noto Earthquake (Mw 7.5) in the Epicentral Area
- 4-P13 Sugeng Sugeng
Multiparametric Analysis of Geomagnetic Precursors Associated with the October 1, 2022 Tarutung Earthquake (Mw 5.8) Using Ground Surface ULF Signals and Swarm Satellite Data

- 4-P14 JOEL MAQUILING
Applications of magnetometer - based techniques from laboratory materials research to geophysical monitoring
- 4-P15 Hiroki Matsushita
Toward a Comprehensive Database of Solar Flare Effects (SFE)
- 4-P16 Ryosuke Okubo
Statistical Analysis of Geomagnetic Variations due to Soft X-ray/Extreme Ultraviolet Radiation During Solar Flares Using Magnetometer
- 4-P17 Tanja Petersen
Capturing Geomagnetic Storms: From Observatory Data to Auroras and Space Weather Hazards
